What are the benefits of Complete Streets?

- Complete streets create a balanced transportation system that can create economic growth and stability by providing accessible and efficient connections between residences, schools, parks, offices, public transportation and retail destinations.
- Improves safety by reducing crashes through safety improvements.
- Encourages more walking and bicycling in a country with high obesity levels.
- Helps ease transportation congestion and increases overall capacity of the network.
- Helps children by providing spaces for bicycling and walking so they can be active and gain independence.
- Creates good air quality by minimizing motor vehicle miles traveled - if each resident of a community of 100,000 replaced one car trip with one bike trip just once a month, it would cut carbon dioxide (CO²) emissions by 3,764 tons per year.
- · Integrating sidewalks, bike lanes, transit amenities and safe crossings into the initial design of a project makes fiscal sense, sparing the expense of retrofits later.

CYCLE ON HAWAI'I IS THE HOST OF HELE ON KAKA'AKO

COVER ART BY SOLOMON ENOS

Client: KSBE

Ink: 4/color

PROMOTING HEALTHY LIFESTYLES THROUGH CYCLOVIAS

Hele On Kaka'ako will be Hawai'i's second Cyclovia, and the first in Our Kaka'ako.

We've closed the streets for Hele On Kaka'ako to allow pedestrians, cyclists and people using other active transportation the opportunity to feel comfortable riding and walking while becoming reacquainted with their community.

The event starts with a 5k run and includes a bike share program, suggested bike ride route, the Cycle On Runway, bicycle repair and education, exercise classes, a skateboard ramp, food vendors, entertainment and prizes. Fill up your activity card with eight stamps and join us at the stage in Mother Waldron Park for prize drawings every hour on the hour. Grand prize giveaway is at 2:00 p.m.

In addition to promoting active and healthy lifestyles, Hele On Kaka'ako features a mock-up of a complete street on Cooke Street from Ala Moana to Halekauwila Street. The project showcases a balanced transportation system that provides accessible and efficient connections between residences, schools, parks, public transportation, offices and retail destinations.

Our Kaka'ako is a community encompassing nine city blocks in the heart of Kaka'ako surrounding the emerging arts, culture and creative center of Keawe, Auahi and Cooke streets. It is a commitment by Kamehameha Schools to design a thriving neighborhood rooted in education, authenticity and cultural responsibility. Our Kaka'ako will feature complete streets with people-centric, sustainable pathways designed for pedestrians, bicyclists and mass-transit. In Our Kaka'ako, people are the center of design.

Hele On Kaka'ako is being recorded and will be broadcast on 'Ōlelo

Bike ride escorts provided by the Red Hot Ladies leaving Mother Waldron Park hourly starting at 11:15am and the Gateway Park Mauka hourly starting at 11:45am.

Paradise Pedals: 16 passengar bicycle that is pedal powered by its riders **HCDA Conference Room:** Traffic Simulation & Educational Materials
